

I'm very concerned regarding the possible loss of our local "klove" radio station transmission due to the proposed change to 1pfm. this station provides a "SAFE" place for our family and especially our children, it is so important to us that we monthly donate 50.00 to support this station. I understand that the fcc can not censor content to the degree that we would like , but this station allows for that freedom to be available for everyone who wants it. not everyone wants their young children to listen to howard stern, or the local "morning show" containing profanity and demoralizing conversation and music. thank you for your consideration of the comments of the public. this world would be a much better place more stations like this one , you should listen sometime and consider its value. Thank you Ralph Vandyke.
